

HEAR WHAT OUR USERS SAY:

“The compounds arrived safely. I want to express sincere gratitude to Boehringer Ingelheim for sharing these amazing tool compounds!”

“This is a fantastic collaboration and I hope we can generate some useful data to share.”

“I am extremely looking forward to test it on my cells!”

“Thanks for the compounds, they have arrived well and super fast.”

Each molecule comes with a **comprehensive profile**

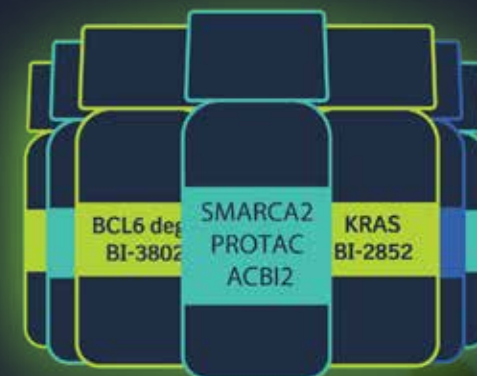

Including

- Structural data
- Rich pharmacology package
- Negative control molecule*
- Selectivity data set
- References

[Download without registration](#)

*not available for all molecules

ORDER MOLECULES FOR FREE
Accelerate your research

80+ molecules available **free** of charge

New molecules added on a regular basis

All results generated with these molecules **belong** to you

Publish **independently**

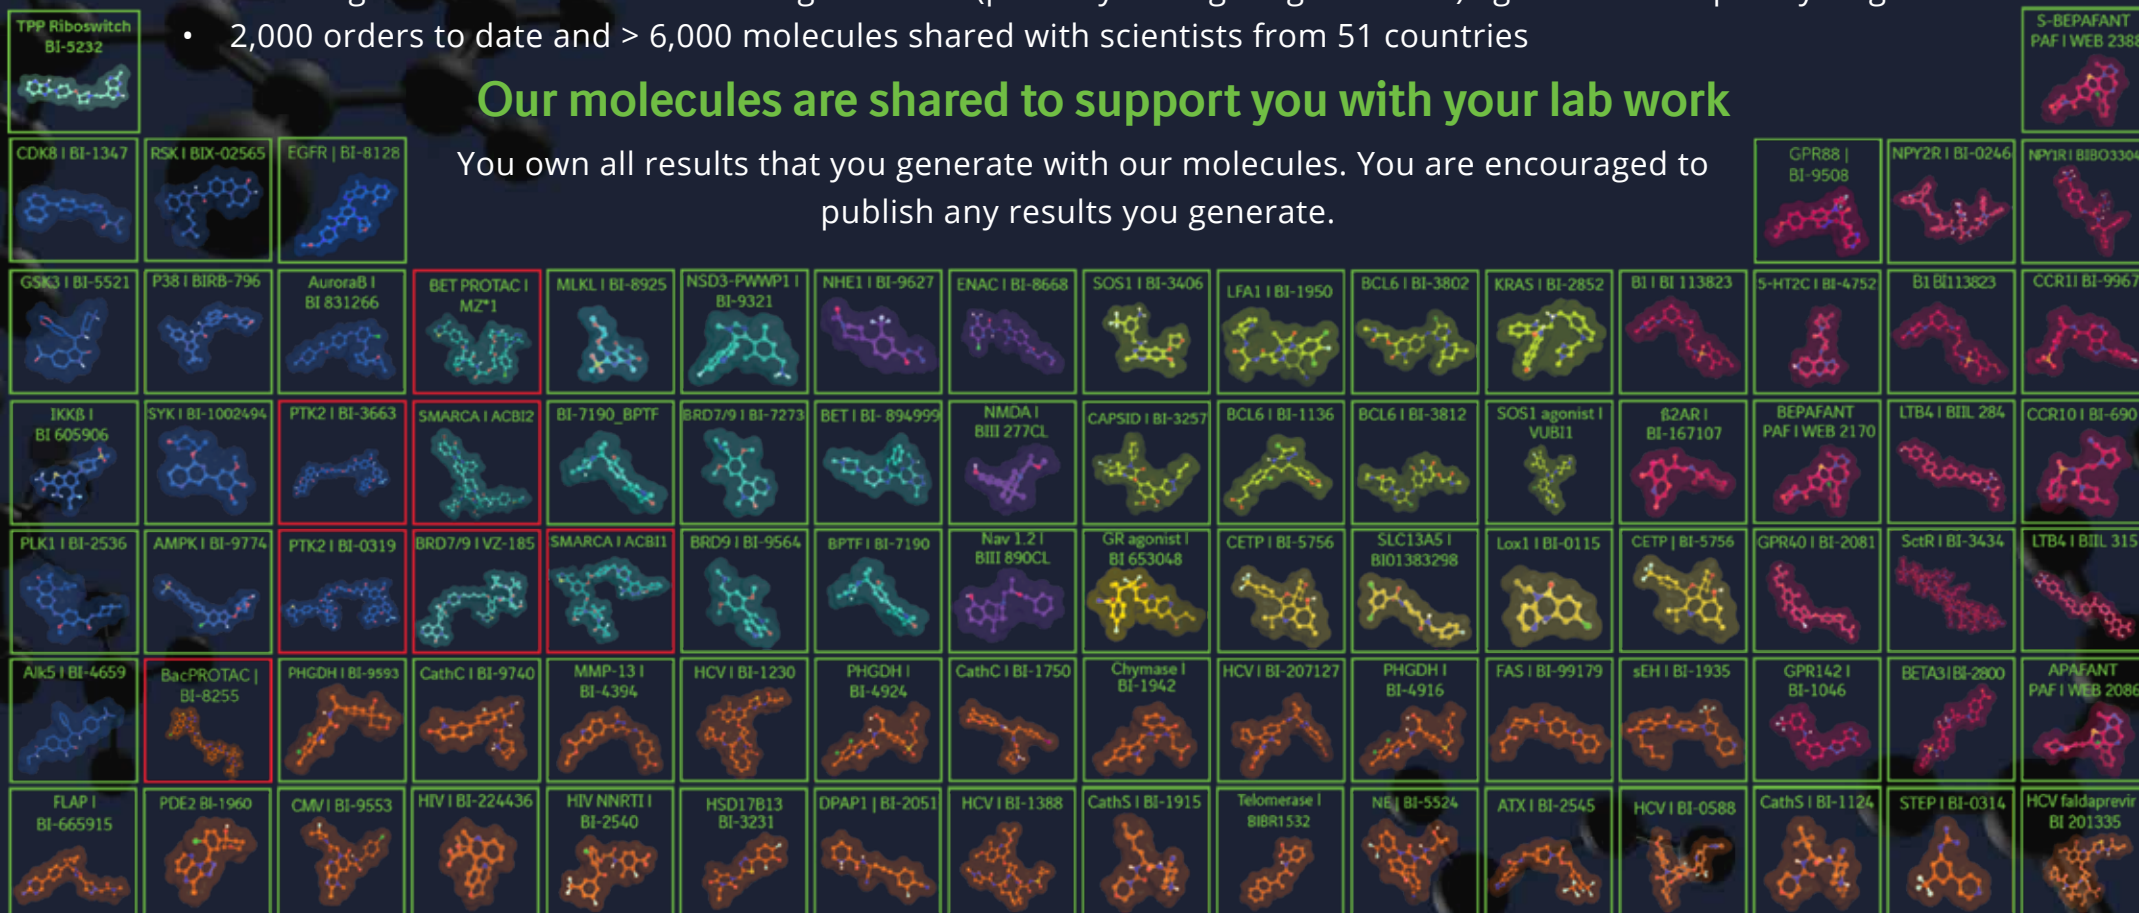

[Order for free now on opnMe.com](#)

Select any molecules from our growing selection of well-characterized tool compounds for pre-clinical bench research

- Covering ten different MoAs including PROTACs (proteolysis targeting chimeras) against contemporary targets
- 2,000 orders to date and > 6,000 molecules shared with scientists from 51 countries

Our molecules are shared to support you with your lab work

You own all results that you generate with our molecules. You are encouraged to publish any results you generate.

■ GPCR
 ■ MEMBRANE PROTEINS
 ■ NUCLEAR RECEPTOR
 ■ EPIGENETIC TARGET
 ■ MEMBRANE TRANSPORTER
 ■ ION CHANNEL
 ■ KINASE
 ■ PPI TARGET
 ■ ENZYME
■ RNA TARGET
■ PROTACS ARE FOUND IN THE RED FRAME BOXES
